

Lay-In

for T-Bar Grid Systems

The Classic Tin Styles insert easily into any existing or new suspended ceiling grid system changing the look of any room in hours. Grid Covers are available in all 17 finishes to match your panel of choice. Panel materials are designed for use in interior areas not directly exposed to sunlight and where temperatures do not exceed 140°F (60°C).

The easy way to give your ceilings a new dimension in style!

Step 1 – Choose a style that reflects your personal taste. ACP's attractive, highly durable panels offer a custom look without the custom expense.

Step 2 – Select a finish to complement any décor—from Bermuda Bronze to Copper Fantasy. Or select Paintable White and customize your own color finish to perfectly match your space.

Room Planning – Determine the quantity of panels needed. For an existing suspended ceiling, count the number of whole panels, and the number and size of border panels. When installing a new grid system, perform the same count off of the grid layout plan. Large indentations in styles like Traditional 3 & 5, Art Deco, Rosette, and Coffe prevent them from being cut in the middle and resting level on the grid at border areas. Accordingly, these styles look best when Border Fill panels are used on the perimeter of the room. The remaining styles look best when full-size style panels are cut for the borders (not Border Fill panels). If the existing border panel width is less than 12", two border panels can be cut out of one full-sized panel.

of whole panels _____

of border panels > 12" _____

of border panels < 12" (divide # by 2) _____

Total panels required _____

Step 3 – Choose Border Fill panels if needed. Use with Traditional 3 & 5, Art Deco, Rosette, and Coffe styles when less than full panels are needed.

Step 4 – Choose matching finish Grid Covers, if desired. They simply snap over the existing suspended ceiling grid system to complete the look of the ceiling.

Lay-In panels are easy to install. Complete installation instructions are included with your order, and can be found online at www.acpideas.com.

Grid Systems to Match Finishes

Vinyl Suspension System™ HG-Grid™

The Easy, Rustproof Alternative to Metal Grid
HG-Grid was created to handle high humidity rooms, installs easier than standard metal grid systems and offers more options. Works with most 2'x2' or 2'x4' panels and is available in all finishes.

Surface Mount Grid System™ CeilingMAX™

Installs Easily to Maximize Your Headroom
CeilingMAX uses "snap in" technology to easily mount your ceiling to any surface - gaining headroom, flexibility and quick installation. Works with most 2'x2' or 2'x4' panels and is available in all finishes.
